

MAGDALENA

Meet MAGDALENA, a 24-year-old powerhouse hailing from the scenic landscapes of Tyrol, Austria. She's not just an alternative pop artist. She's a singer, songwriter, actress and voice artist. But her true magic lies in her voice - sultry, deep, and emotionally charged, with a vocal range that'll leave you spellbound.

MAGDALENA writes alternative pop music and incorporates facets of the subgenres cinematic pop, art pop, dark pop and ambient pop. Her music is a genre-defying journey, a blend of all the facets of modern pop music. Her broody and biting satirical melodies, along with soul-searching lyrics, create a sonic landscape like no other.

In 2020, she released her debut single "The Living Rhapsody", which she wrote at the age of 14 while experiencing severe depression for many years. 6 years later, the singer felt ready to find peace with her experiences and put her single into production. In an interview on the ORF Radio Tirol program "Tirol am Beat" with Klaus Horst, she talks about the meaning of "The Living Rhapsody". MAGDALENA has released a total of 8 singles since then .

Releases:
